A 6" x 16" double-sided segmental retaining wall, with tapered sides and an independent mechanical interlock, allowing for a vertical or battered wall. Semma also has tremendous shear strength (block to block contact), void fill interlock (4 cored system with contractor gravel-filled cores), and a 1/2" bond for joint dispersion. Semma wall, with an integrated Coin on every layer, makes a great solution to the raised patio quandary: building a structural wall and topping it with a parapet (free-standing wall). Use the Semma pillars to finish or add drama or light features to your wall. Polished finish only available in Canada. Semma is part of the dry cast collection.

Our Valet pavers are a great way to add character and a touch of luxury to any driveway. These 6 1/2 by 6 1/2 inch square shaped units were inspired by lava rock/basalt stone, the highly textured surface of the Valet paver brings added visual interest to bandings, mosaics and complete pavements with the same salt-resistant qualities you expect of Techo-Bloc's dry cast line.
